## Skills

C++ | Python | Java | Figma | HTML | CSS | JavaScript | SQL | React.js | Microsoft Excel | MySQL | Git | GitHub |

## Projects

### Project 1

### Wheel-o-Rent

Designed and developed a responsive vehicle rental web platform as part of a 4-member team, focused on user-friendly UI/UX and seamless booking flow.

- Created the frontend using HTML, CSS, and JavaScript; led UI design using Figma to ensure consistent visual identity.
- Collaborated with backend team to integrate booking logic, availability tracking, and real-time updates for a smooth user experience.
- Emphasized modular design principles and cross-browser compatibility for a scalable and intuitive interface.

### Project 2

### Resume Insight - AI Resume Analyzer

- Analysed resumes using data-driven insights to identify strengths and improvement areas
- Built recommendation system for personalized improvements based on job descriptions

## EXPERIENCE

### Data Analytics Intern | Imarticus

**Jun 2025 - Jul 2025**

- Applied data analysis using Excel, SQL, Python for actionable business insights
- Created visualizations using Tableau/Power BI and derived KPIs for business decisions
- Conducted statistical analysis and presented insights through dashboards and reports

### Converge 3.0 Alumni Meet | PR & Management Team Member

**March 2025**

- Oversaw the boys' room allocation process, ensuring proper organization and accommodation.
- Managed promotional campaigns, logistics, and alumni engagement activities to boost participation.
- Handled the calling system, assigning calls to team members for efficient communication.
- Coordinated with various teams to ensure seamless event planning and execution.
